

PROJECT 6

Final Portfolio

The final portfolio will be a collection of all projects from the semester, combined into a multi-page PDF made in InDesign.

Each page should contain the size, medium (Photoshop, Illustrator, etc) and title of the project.

The portfolio will have a title page with the student's name, class name and semester.

Design principles such as hierarchy, alignment, layout, scale and continuity should be considered with every page.

Each project should contain text describing what the challenge was and how that challenge was solved. Consider each critique when asked "What did you learn?". Include any technical, formal or conceptual knowledge learned on the project.
